PROFESSIONAL EXPERIENCE

FRONT-END DEVELOPER – The Designer Developer LLC, Denver, CO

May 2019 – Present

- Built various interactive user interfaces using HTML, CSS, JavaScript, and PHP to optimize functionality and improve the user experience. Along with other tools like SSH, GIT, and FTP for a better workflow.
- Demonstrated exceptional skills and technical expertise by optimizing website and application user experience (UX) and user interface (UI) by leveraging graphic design skills to improve usability, visual appeal, and responsiveness on multiple devices.
- Expanded website accessibility and reach by employing versatility on different web technologies to achieve cross-browser compatibility.
- Streamlined websites performance by keeping updated about the knowledge of web development trends, JavaScript libraries, and frameworks through continuous learning, creating efficient and effective websites and applications

WEB DEVELOPER – Rounded Digital, Denver, CO

July 2017 – December 2018

- Successfully performed web development duties by actively designing and managing website content, creating graphics, and directing multimedia content through search engine optimization to drive organic discovery and high-quality traffic continuously.
- Strengthened communication by organizing and coordinating regular meetings with clients to convey project status and milestone execution based on defined performance expectations, ensuring smooth and successful execution of project plans.
- Spearheaded streamlining of the data management and customer support sector, further enhancing customer satisfaction.
